Install and configure the module (back-office)

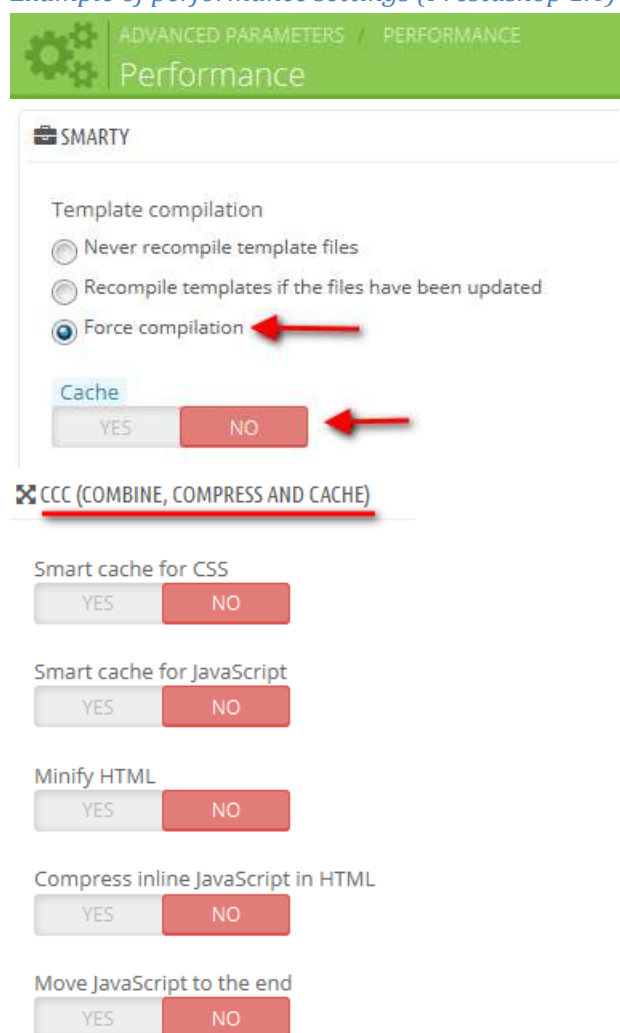

Performance settings

IMPORTANT

Remove any performance cache smarty settings and CCC parameters before installing the module. You will set them back afterwards.

- 1. Please keep in mind the current performance settings (back office / advanced parameters / performance.**
- 2. Change as follow :**
3. Should you have install the module before change performance settings, please refresh front office pages of the module (donator's page, creator's page) to look for changes.
- 4. Please come back to your previous performance settings once the module is installed.**

Example of performance settings (Prestashop 1.6)

The screenshot shows the 'Performance' settings page in Prestashop 1.6. The page has a green header with 'ADVANCED PARAMETERS / PERFORMANCE' and 'Performance'. Below the header is a section titled 'SMARTY' with a sub-section 'Template compilation'. There are three radio buttons: 'Never recompile template files', 'Recompile templates if the files have been updated', and 'Force compilation'. The 'Force compilation' option is selected, indicated by a red arrow. Below this is a 'Cache' section with two buttons: 'YES' and 'NO'. The 'NO' button is highlighted in red, also indicated by a red arrow. Below the 'Cache' section is a section titled 'CCC (COMBINE, COMPRESS AND CACHE)' which is underlined in red. This section contains five settings, each with 'YES' and 'NO' buttons: 'Smart cache for CSS', 'Smart cache for JavaScript', 'Minify HTML', 'Compress inline JavaScript in HTML', and 'Move JavaScript to the end'. In all cases, the 'NO' button is highlighted in red.

Example of performance settings (Prestashop 1.5)

Advanced Parameters > Performance

 Smarty

Template cache ☐ Never recompile template files
☐ Recompile templates if the files have been updated
☒ Force compilation

Cache ☐  ☒ 
Should be enabled except for debugging.

 CCC (Combine, Compress and Cache)

Smart cache for CSS ☐ Use CCC for CSS.
☒ Keep CSS as original

Smart cache for JavaScript ☐ Use CCC for JavaScript.
☒ Keep JavaScript as original

Minify HTML ☐ Minify HTML after "smarty compile" execution.
☒ Keep HTML as original

Compress inline JavaScript in HTML ☐ Compress inline JavaScript in HTML after "smarty compile" execution.
☒ Keep inline JavaScript in HTML as original

Example of performance settings (Prestashop 1.4)

- Go to Smarty (Preferences/Performance)
 - Click « Force compilation » yes
 - Click « Cache » **no**
- Go to CCC (Preferences/Performance)
 - Click « keep ... as original » as described above for Prestashop 1.6 and 1.5

Example of performance settings (Prestashop 1.3 and less)

- No settings available

Download the module

Prestashop version superior to 1.3

Connect to back-office

Click "Modules" sheet,

- ✓ "add a module from my computer"
- ✓ In the section "module file" select the zip file of the module "blockwishlistpro.zip"
- ✓ "upload this module"

Prestashop version inferior to 1.3

- ✓ Unzip the blockwishlistpro.zip file. You can use 7-zip with the option "extract here". You obtain a directory named blockwishlistpro.
- ✓ Copy and paste the blockwishlistpro directory to the "modules" directory of your shop.

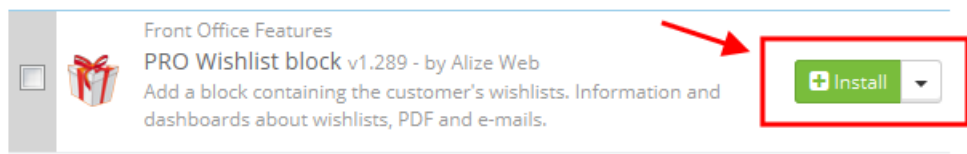

Install the module

- ✓ Click “Front Office Features” (or “Blocks” depending on versions with Prestashop < 1.4)

Comment

Please note that the new module (Pro Wishlist block) appears in the modules list.

- ✓ Click “install”

Configure the module

Click “configure”

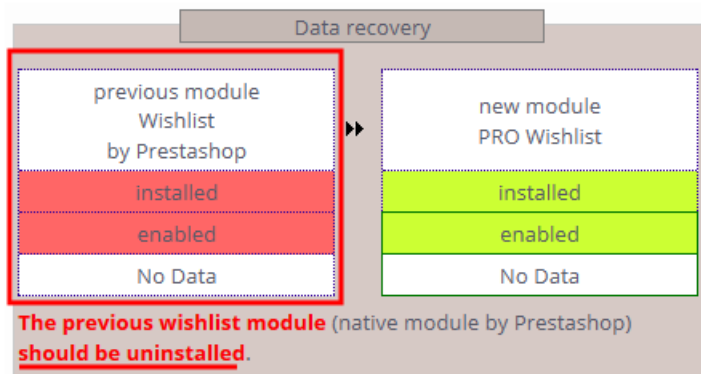

Installation message

According to your installed modules you may read the following cases.

The “recovery data” block may be displayed.

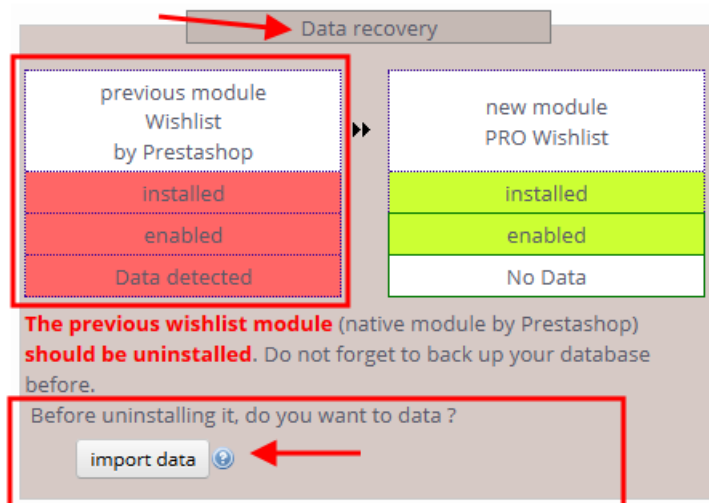

Case 1: Prestashop “blockwishlist” module installed without data

→ The native prestashop module has been installed and no wishlists have been created (No Data).

- > **The native prestashop module must be uninstalled.**

Case 2: Prestashop "blockwishlist" module installed WITH some lists already created

- The native prestashop module has been installed and some wishlists have been created (Data detected).
- > You may want to **import these lists** in the new module; Click "import data". Please do not forget to backup the database first for security reason.
 - > **The native prestashop module must be uninstalled.**

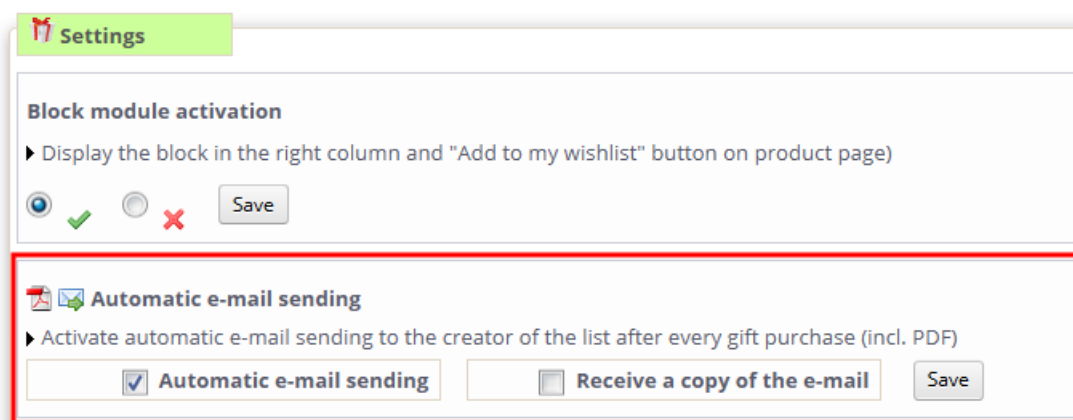

E-mail sending settings

Creators of a gift list may want to **be informed** as soon as **someone offers them a gift** from their list.

The "wishlist pro" module features this fonctionnality. An **automatic e-mail** will be **sent to the creator of a giftlist** when someone purchases a gift. A pdf is included and details gifts, name of donators and their messages.

As a merchant, select "receive a copy of the mail" if you wish to receive a copy of the automatic e-mail sending.

By default automatic e-mail sending is activated and copy of the automatic e-mail sending is disabled.

Comments

An e-mail including a pdf summary can be sent by the merchant at any time. Please refer below to the section Dashboard of the module / customers view / PDF and EMAIL.

Translate wishlistpro

Translate some phrases in an easy way through the translation tool.

Caution : do not insert ' or ".some javascript errors may arise.

Back office main menu according to Prestashop version

Prestashop 1.6	Prestashop 1.5	Prestashop 1.4	Prestashop 1.3
Back office / Localization / translations	Back office / Localization / translations	Back office / Tools / translations	Back office / Tools / translations

Then fill in the form as follow.

Translation select form

- Prestashop 1.6

Type of translation

Select your theme

Select your language

- Prestashop 1.5

 **Modify translations**

Here you can modify translations for every line of code inside PrestaShop.
First, select a section (such as Back Office or Installed modules), and then click

- Prestashop 1.4 and 1.3

 **Modify translations**

Here you can modify translations for all text input into PrestaShop.
First, select a section (such as Back Office or Modules), then click
you want to edit.

Display the 'Wishlists' block and the search form (front-office)

Definition

The block features a search form to search for a list by creator's name (or part of it), a link to manage the lists and displays products of one list.

WISHLISTS

Offer a gift
 Search for a list by name
 >> 

Manage my list(s)

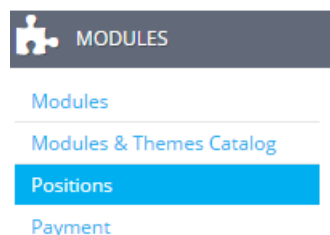

View my list(s)
 Select a list to display it below
 >> 
 No products

Display

By default the 'Wishlists' block is hooked to the right column and will be displayed on the right provided that the theme displays a right column.

Hook to the left column

Provided that the theme displays a left column, please find below an example based on Wishlistpro module: how to hook it to the left.

Click « Transplant a module »

 **TRANSPLANT A MODULE**

* Module

* Hook into

(exemple Prestashop 1.6 and 1.5)

Prestashop 1.4 and 1.3: select “Left column blocks”.

Click « Save »

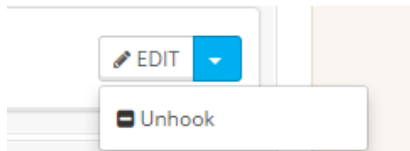

Unhook the right column

Do not forget to unhook the right column.
Go to the « right column blocks » section

And select Wishlist pro.

Click « Edit », « Unhook »

Sort modules inside a section

Go to the relevant section of Modules / positions menu.

Drag and drop the module line to the new position.

BONUS – Display the search for a list form on a page

The prerequisite is that your theme features these columns. The issue is that more and more themes display only one column. So the search box can't be displayed.

You may wish to display the search form on home page or cms pages.

Insert the code in the tpl file(s) of your theme and adapt it to your site.

```
<form action="http://www.mysite.com/module/blockwishlistpro/searchlist" method="post" name="searchform">
<input id="searchname" title="owner's list name or part of it" type="text" name="searchname" value=" ">

<input type="hidden" name="pathurl" value="http://www.mysite.com/modules/blockwishlistpro">
<input type="hidden" name="id_lang" value="1">
</form>
```

Gift coupon

Use

Some of your customers would like to add gift coupons to their list. The objective is to let donators

- feel free about the list because they may not want to choose a specific product in the list
- fix the amount of the gift accurately

This is like a contribution. At the closure of the list, you will generate a credit slip to refund this total to your client who has created the list.

Create a gift coupon

- First create a new product called « gift coupon ». Set the price (for example 10€) and add a new image by selecting the « gift.gif » file in the modules/blockwishlistpro directory.
- When creating his list your customer could add this gift coupon as a product. It is advised to choose “top” as priority to display it on the top of the web page (top=first).
- The donator will purchase this product as everyone else.

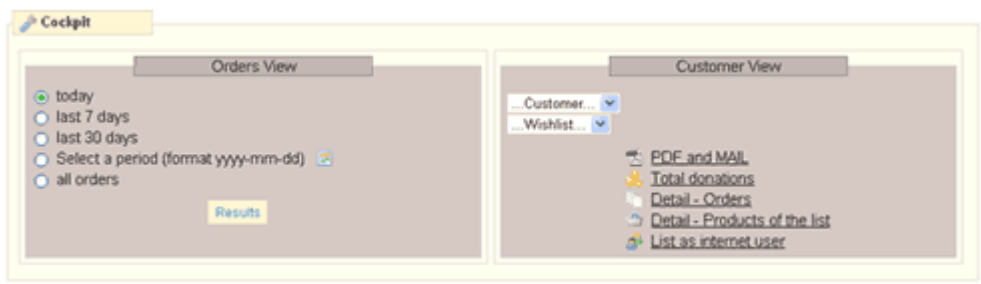

Dashboard of the module (back office)

Access the back-office

To access the back office of the module click “configure” on the line “PRO Wishlist block” in the list of modules.

Find out all data regarding the wishlists in the cockpit section.

For instance you may want to get the orders of the day placed through wishlists (block « orders view »). Or print the pdf of products boughts on the list of one of your client before an appointment with him (block « customer view »).

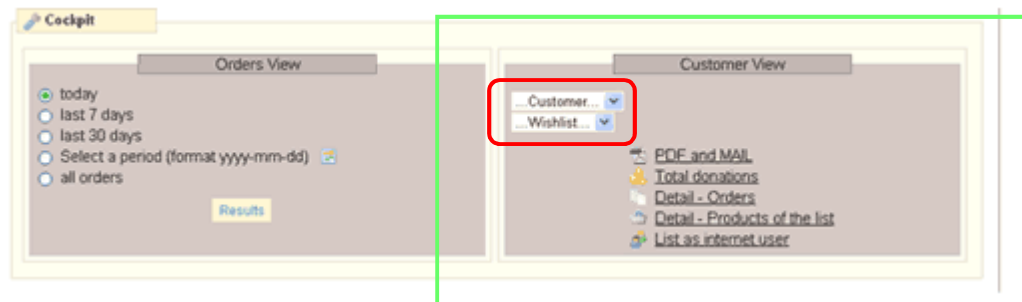

Orders view : orders of wishlists over a period

By selecting the period (for example “last 30 days”) the list of orders of wishlists over a period is displayed. The list can be exported or printed out.

Customer view

Select a client and get all the information about his (her) wishlist : total of purchases, detail by order, detail of bought products.

PDF and MAIL

Click “pdf and mail” and view the summary wishlist PDF of the selected client and the selected wishlist : offered products and donators, messages of donators. You can also send the pdf by email.

Total donations

By clicking “total donations” the total of gifts is detailed.

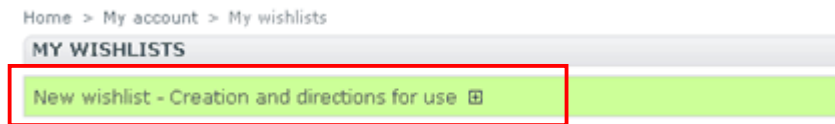

The detail of orders and bought products can be displayed. If needed be, you can go directly to the back-office of one order or one product

Create a list

Log in (or create your account if need be)

Create the list

- ✓ Click “my wishlists” in the “My account” block
- ✓ Then click “New wishlist – Creation and directions for use”

You can read the directions for use detailed in 3 sections.

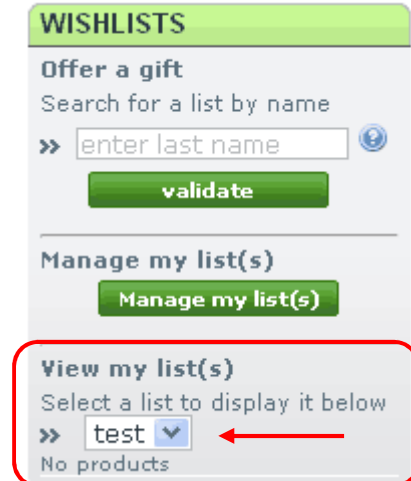

- ✓ Enter the name and save it

The list has been created.

Add products to your list

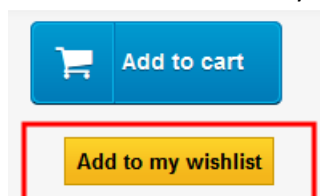

Select your list

Should you have more than one list, please select the list on the product page or in the 'Wishlists' block before adding products.

Add products

- ✓ Go to each product page you want to add to your list
- ✓ Adjust quantity
- ✓ Click « add to my list »

Look at the added products

Added products are displayed “in live” in the 'Wishlists' block.

A product can be deleted by clicking . Should you want to change quantity later on, please click “Manage my list(s)” and refer to the section below (“Manage your lists”).

Send the wishlist address

You can get here the permalink of your list [1], send the list webpage address by email [2], add your personal message to the default message [3], and view your e-mail before sending [4].

The screenshot shows the 'Send the wishlist address' interface. At the top, there are three tabs: 'Products management', 'Offered gifts', and 'Send the wishlist address' (which is highlighted with a red box). Below the tabs, the form contains the following elements:

- Link to the list:** A text field containing a URL: http://localhost/test/prestashop_1.4.4.0/modules/blockwishlistpro/view.php?token=C26FFAE2A71540B3. This field is annotated with a red box and the number 1.
- Recipients' emails:** A list of ten email input fields, labeled 'Email1' through 'Email10'. The first field has a red asterisk indicating it is a required field. This section is annotated with a red box and the number 2.
- Personal Message (optional):** A large text area for adding a personal message. It is annotated with a red box and the number 3.
- Buttons and Instructions:** At the bottom, there is a 'Send' button and a section with instructions: 'To view your e-mail before sending, click on 1 and 2 below'. Below this, there are two links: '1. Create email' and '2. View email (in a new sheet)'. This entire bottom section is annotated with a red box and the number 4.

Communicate your list

In addition to the option "send the wishlist address" above it is possible to find out your list by entering your name into the "wishlist block". Hence you just have to communicate the name of the e-shop to your friends.

The screenshot shows a 'WISHLISTS' block with the following elements:

- WISHLISTS** (Section Header)
- Offer a gift** (Section Header)
- Search for a list by name** (Text)
- Input field:** A text input field with the placeholder text 'enter lastname'. This field is highlighted with a red box.
- validate** (Button)

Offer a gift

View the wishlist

To offer a gift please go to the web page of the list either by searching the list by name or by clicking the direct link you may have received.

- Search by name

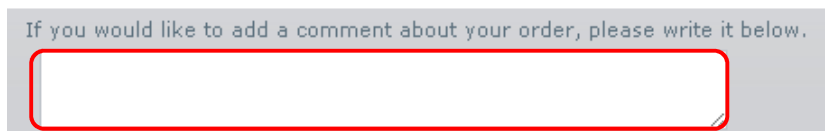

And click on the wishlist link

Buy a gift

- ✓ Take your pick. You can select one or several products.
- ✓ If need be adjust the quantity to offer
- ✓ Click "Offer the gift"

Check out

- ✓ Click "check out" in the cart block
Create your account or log in
- ✓ To send a message to the recipient of the gift please fill in your message in the text area : 'If you want to leave us comment about your order, please write it below.'

- ✓ Click 'Pick up in-store' in the carrier section to cancel shipping costs.
- ✓ Choose your payment method and confirm your order.
